MONTH IN REVIEW
February 1994

Civilian Labor Force

Beginning with January 1994, official unemployment rates were based on a redesigned household survey. It will take several months before data from the new survey can be used to accurately gauge labor market conditions.

The state's unemployment rate rose to 8.5 percent in February 1994 from 8.2 percent in January as the jobless situation worsened and resident employment declined. The unemployment rate increase does not necessarily signal an end to the slowly improving labor market conditions in New York State as indicated by the Labor Department's separate survey of business places. All major labor areas, except New York City, experienced a higher rate of unemployment in February. New York City's jobless rate fell from 10.8 percent in January to 10.0 percent in February as the number of persons seeking work dropped 25,000 over the month.

Nationally, the unemployment rate moved lower in February, falling to 7.1 percent from 7.3 percent in January. The improvement in the nation's rate reflected a 230,000 drop in unemployment.

Unemployment in the state was up unexpectedly in February, rising 23,000 from January to 725,000. In recent years, the state's jobless rate has shown a tendency to decline in February.

As noted earlier, the employment situation will continue to merit careful scrutiny because of the wholesale changes in the methodology for estimating 1994 data.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 31,900 or 0.4 percent from January 1994 to 7,665,000 in February. Seasonal job gains in services and the public sector highlighted the advance in nonfarm employment.

Recalls of hourly workers in private colleges and universities accounted for 62 percent of the 24,700 pickup in services jobs. Hiring in business services, and engineering and management services also contributed heavily to the services advance. In government, a 17,900 job rise was almost entirely due to the recall of workers by school districts, community colleges and state universities and colleges. (Hourly employees in both public and private education are often furloughed during a between-semester break and recalled afterwards.)

Employment increased in three other industry divisions in February--manufacturing (+4,900), finance, insurance and real estate (+1,100) and transportation and public utilities (+200). Seasonal hiring by garment manufacturers was responsible for most of the factory sector improvement, while stepped-up hiring by Wall Street brokerage houses buoyed finance-related employment. Staff additions in the air transportation, trucking and bus industries barely offset job losses elsewhere in the transportation and public utilities division.

Job losses occurred in wholesale and retail trade (-11,000) and in construction (-5,800). Nearly all retail components reported lower job levels in February with only eating places enjoying increased employment. Construction activity continued to slow, reaching its annual low point. Special trade contractors posted nearly three-quarters of the construction retrenchment.

Since February 1993, nonfarm employment has gained 62,400 jobs, an increase of 0.8 percent. Job additions in services (+70,400 or +3.0 percent) and trade (+11,900 or +0.8 percent) led the upturn. Lesser gains were reported by the transportation and public utilities group (+4,900 or +1.2 percent), construction (+2,300 or +1.1 percent), and finance, insurance and real estate (+1,100 or +0.2 percent). Industry divisions where employment fell below year-ago levels included manufacturing (-27,000 o -2.8 percent), and government (-1,500 or -0.1 percent).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1993 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN AREAS

Metropolitan areas are defined according to a set of detailed standards published by the federal Office of Management and Budget (OMB). Effective April 1, 1990, the set of areas known as Metropolitan Statistical Areas (MSAs) Primary Metropolitan Statistical Areas (PMSAs) and Consolidated Metropolitan Statistical Areas (CMSAs) were designated collectively as Metropolitan Areas (MAs).

Under these standards, a Metropolitan Statistical Area must have a city with a population of 50,000 or more or an urbanized area of at least 50,000 population, and a total metropolitan area population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the major city, an MSA may include additional counties with strong socio-economic ties to the central county.

If an MSA has a population of 1 million or more, counties or groups of counties within the MSA may qualify as a Primary Metropolitan Statistical Area. An MSA in which two or more PMSAs are identified is designated a Consolidated Metropolitan Statistical Area.

OMB updates the list of Metropolitan Areas each June, adding new areas that qualify as MSAs on the basis of the Bureau of the Census' intercensal population estimates or special census population counts.

Labor Market Areas

Estimates of employment and unemployment are published for a number of areas in the state that do not meet the MSA qualifying criteria. These areas are called Labor Market Areas (LMAs).

The geographic composition of selected areas is given below:

Albany-Schenectady-Troy MSA. Albany, Montgomery, Rensselaer, Saratoga, Schenectady and Schoharie counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls MSA. Erie and Niagara counties.
Dutchess County PMSA. Dutchess County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Newburgh, NY-PA PMSA. Orange county, NY and Pike County, PA.

Labor Market Areas--continued

Putnam LMA. Putnam County.
Rochester MSA. Genesee, Livingston, Monroe, Ontario, Orleans and Wayne counties.
Rockland LMA. Rockland County.
Syracuse MSA. Cayuga, Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles.* SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State.** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

Revised

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 40 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

94-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1991.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1991.

MONTH IN REVIEW
March 1994

Civilian Labor Force

Beginning with January 1994, official unemployment rates were based on a redesigned household survey. It will take several months before data from the new survey can be used to reliably gauge labor market conditions.

New York State's unemployment rate declined from 8.5 percent in February 1994 to 8.1 percent in March as joblessness receded and resident employment expanded. These changes, along with an increase in labor force participation (61.5 percent in March compared with 60.9 percent in February), reflected a slowly improving labor market.

Nationally, the rate of unemployment fell 0.3 of a percentage point from February to 6.8 percent in March as the number of jobseekers dropped by 388,000 over the month.

New York City, which comprises nearly 40 percent of the state's labor force, saw its unemployment rate worsen over the month. The city jobless rate rose 0.3 of a percentage point from February to 10.3 percent in March. All major labor areas outside the city experienced lower unemployment rates in March.

Unemployment in the state decreased 23,000 falling to 702,000 in March, the same level as in January. Over the previous five years, the February-to-March change averaged a decrease of 40,000.

As noted earlier, the employment situation will continued to merit careful scrutiny because of the wholesale changes introduced with the 1994 data.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State increased 58,200 from February 1994 to 7,723,200 in March with all major industry divisions sharing in the upturn. Although the job count normally climbs from February to March, this year's gain was the strongest for March since 1990.

Job gains, primarily seasonal, in services, trade, and government accounted for 70 percent of the state's nonfarm job expansion in March. Staff additions of health service, business service, and social service workers were responsible for nearly half of the 20,400 upturn in services jobs. Seasonal hires by eating places dominated trade employment (+10,500). The trade job expansion was the largest February-March gain in four years. The recall of hourly workers in the local education system following the mid-year break accounted for most of the 10,100 rise in public employment.

The remaining industry divisions posted smaller, but no less significant gains. The construction industry, emerging from its annual February low point in terms of activity, got off to a particularly strong start, adding 9,600 workers to its payrolls; the job gain was the eighth largest March increase in a 24-year period. Increased staffing by the brokerage and real estate industries led the job advance (+3,100) in the finance, insurance and real estate industry. Jobs in the factory sector were up moderately in March (+2,700) as nondurable goods employment gains, particularly hires in the apparel industry, more than offset losses among durable goods payrolls. The transportation and public utilities group added 1,600 workers to its February job total with seasonal staff buildup by trucking companies dominating the employment expansion.

Over-the-year comparisons, which are not influenced by seasonal variations, indicated that there were 88,700 or 1.2 percent more nonfarm jobs in New York State in March 1994 than a year ago. The job count has been up over the year since May 1993. From March 1993 to March 1994, nonfarm employment rase in all but two metropolitan areas--Poughkeepsie and Binghamton. The well-publicized restructuring of IBM has adversely affected the job situation in these communities.

March-to-March comparisons by industry division showed that employment has increased in services (+74,400 or +3.1 percent), trade (+28,200 or +1.9 percent), construction (+9,200 or +4.4 percent), transportation and public utilities (+4,100 or +1.0 percent), and finance, insurance and real estate (+3,900 or +0.5 percent). Since March 1993, employment has declined in manufacturing (-28,200 or -2.9 percent), and government (-3,300 or -0.2 percent).

INSURED EMPLOYMENT AND PAYROLLS
SECOND QUARTER 1993

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment, payrolls and reporting unit data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

Effective with the first quarter of 1989, employers with multiple worksites employing 10 or more workers in secondary locations were required to report these worksites separately. Previously, only employers with 50 or more workers at a secondary location were required to file separate multiple worksite reports.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in which the sum of employment in secondary locations exceeds 10 persons, are required to submit a separate report for each unit unless the payrolls are not maintained

separately. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

-- *Albany-Schenectady-Troy*. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
-- *Buffalo*. Erie and Niagara counties.
-- *Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
-- *Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Syracuse*. Madison, Onondaga and Oswego counties.
-- *Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
SECOND QUARTER 1993

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1993 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN AREAS

Metropolitan areas are defined according to a set of detailed standards published by the federal Office of Management and Budget (OMB). Effective April 1, 1990, the set of areas known as Metropolitan Statistical Areas (MSAs) Primary Metropolitan Statistical Areas (PMSAs) and Consolidated Metropolitan Statistical Areas (CMSAs) were designated collectively as Metropolitan Areas (MAs).

Under these standards, a Metropolitan Statistical Area must have a city with a population of 50,000 or more or an urbanized area of at least 50,000 population, and a total metropolitan area population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the major city, an MSA may include additional counties with strong socio-economic ties to the central county.

If an MSA has a population of 1 million or more, counties or groups of counties within the MSA may qualify as a Primary Metropolitan Statistical Area. An MSA in which two or more PMSAs are identified is designated a Consolidated Metropolitan Statistical Area.

OMB updates the list of Metropolitan Areas each June, adding new areas that qualify as MSAs on the basis of the Bureau of the Census' intercensal population estimates or special census population counts.

Labor Market Areas

Estimates of employment and unemployment are published for a number of areas in the state that do not meet the MSA qualifying criteria. These areas are called Labor Market Areas (LMAs).

The geographic composition of selected areas is given below:

Albany-Schenectady-Troy MSA. Albany, Montgomery, Rensselaer, Saratoga, Schenectady and Schoharie counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls MSA. Erie and Niagara counties.
Dutchess County PMSA. Dutchess County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Newburgh, NY-PA PMSA. Orange county, NY and Pike County, PA.

Labor Market Areas--continued

Putnam LMA. Putnam County.
Rochester MSA. Genesee, Livingston, Monroe, Ontario, Orleans and Wayne counties.
Rockland LMA. Rockland County.
Syracuse MSA. Cayuga, Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State.** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

Revised

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 40 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

94-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1991.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1991.

Explanation of Data i

List of Publications v

MONTH IN REVIEW
April 1994

Civilian Labor Force

Beginning with January 1994, official unemployment rates were based on a redesigned household survey. It will take several months before data from the new survey can be used to reliably gauge labor market conditions.

New York State's rate of unemployment was down from 8.1 percent in March 1994 to 7.6 percent in April as both unemployment and employment declined. In New York City, the unemployment rate was 9.5 percent in April, down from 10.3 percent in March. The April rate for the city marked the first time since September 1993 that the rate was below 10.0 percent.

The nation's unemployment rate was 6.2 percent in April, or 0.6 of a percentage point lower than in March.

The number of New Yorkers seeking jobs totaled 655,000 in April, or 47,000 less tnan in March. Over the previous 10 years, the March-to-April change in unemployment averaged a decrease of 40,000.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) advanced seasonally in April 1994, rising 48,000 from March to 7,771,200. A strike by the teamsters union prevented the current April employment from nearly matching the average March-April job increase for 1992 and 1993 (+ 57,000). All major labor areas, except Binghamton (-0.2 percent), shared in the nonfarm job upturn. The largest employment growth occurred in the Glens Falls (+ 1.7 percent) and Utica areas (+ 1.4 percent).

The bulk of the April nonfarm job expansion occurred in the services and construction industry divisions. Services employers added 21,000 jobs to their payrolls with hires in the amusement and recreation, business services, and social services industries accounting for nearly half of the upturn. The advent of warmer weather triggered the upswing in construction activity as employment climbed by 17,200 from March.

Smaller employment gains were registered in the trade (+ 9,700), finance, insurance and real estate (+ 1,500), and government (+ 400) groups. The rise in trade employment was relatively modest compared to April advances in 1992 and 1993 (+ 12,000 and + 17,700 respectively). The current job increase was led by hiring at eating places, building material and garden supply establishments, and automobile dealerships and gasoline stations. The job gain in the finance, insurance and real estate division reflected seasonal hiring in the real estate industry, coupled with staff additions in the brokerage industry. The job count in the public sector was essentially unchanged as employment increases in state and local education barely exceeded cutbacks in other agencies on the federal, state, and local levels.

The nonfarm upturn was slowed by job losses in the transportation and public utilities, and manufacturing divisions. Overall employment in the transportation and public utilities group was down 1,600 over the month because of a nationwide teamster strike that idled about 5,200 workers in New York. The factory sector had 500 fewer jobs in April, largely because of cutbacks in the computer industry.

Since April 1993, nonagricultural wage and salary employment has gained 76,900 (or 1.0 percent) jobs. The job growth was led by staff additions in services (+ 67,600 or + 2.8 percent), trade (+ 20,200 or + 1.3 percent), and construction (+ 9,400 or + 4.1 percent). Smaller gains were reported by employers in finance, insurance and real estate (+ 4,000 or + 0.6 percent), government (+ 1,200 or + 0.1 percent), and transportation and public utilities (+ 1,100 or + 0.3 percent). The only industry division to lose employment over the year was manufacturing (-26,700 or -2.7 percent).

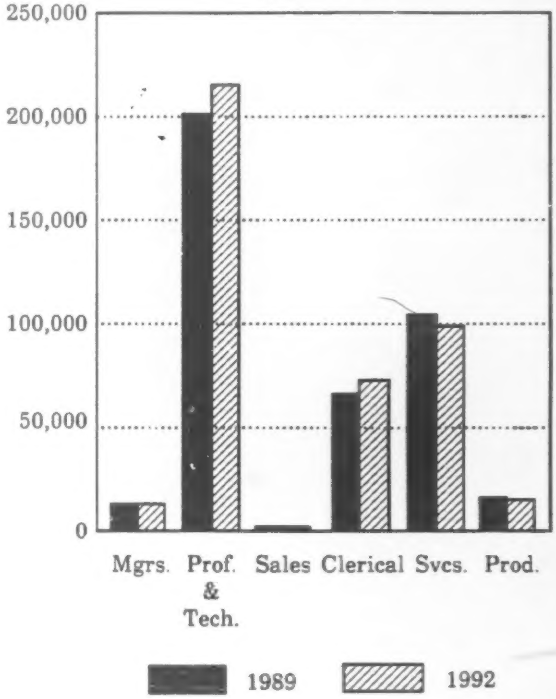
HOSPITALS

The results of a 1992 survey of occupations in private, state, and local government hospitals in New York State show some interesting trends. Hospitals, as covered by this survey, employed 417,600 workers in April 1992. An additional 19,700 workers were employed in federal government hospitals in New York State. Since the prior survey in 1989, employment in hospitals has grown steadily, though at a slower rate than health services in general. Hospitals, which account for just over 50 percent of health services employment in New York State, comprised only 23 percent of health services job growth.

The employment growth in hospitals was not distributed across all occupational groups. Professional and clerical jobs accounted for nearly all the growth, reflecting the increasing levels of administrative support needed in the insurance driven health care industry. The professional administrative jobs -- management support workers, and the clerical jobs -- secretary and bookkeeper, all added significant levels of employment. In addition, since 1989 employment in the medical and psychiatric social worker job nearly doubled. Further research indicated that most of this growth was associated with increased drug and alcohol treatment services in hospitals. Service jobs, which are the second largest occupational group next to professional and technical jobs, lost employment. This decline was the result of a large loss in employment of psychiatric aides in state psychiatric hospitals.

Occupational Employment in Hospitals 1992 and 1989



MANUFACTURING

The result of a 1992 survey of occupations in manufacturing show a continuation of the long-term employment declines in this sector. Since a buildup of manufacturing jobs just before and during World War II, manufacturing employment has been on a nearly steady decline with just a few shortlived upturns during times of economic recovery. From the prior occupational survey in 1989 to the current occupational study of 1992 almost every manufacturing industry experienced employment declines. Only the food, chemical, and petroleum products industries registered small employment gains. The largest losses occurred in the transportation equipment, electrical and electronic equipment, and industrial machinery and equipment industries These three each lost over 200,000 jobs over the period.

The change in occupational patterns between the two surveys reflects the losses in these industries. Production jobs, which comprised 57 percent of manufacturing employment in 1992, accounted for 67 percent of the employment losses. Within the production category, the largest losses occurred in the assembly occupations, particularly in the skilled and semi-skilled electrical and electronic equipment assembler jobs. Clerical jobs also registered significant declines. Especially hard hit were administrative support clericals such as secretaries, bookkeepers, data entry keyers, and computer operators. Among professional jobs, which declined but at a slower rate, there were large employment losses in electrical and electronic engineers and engineering technicians jobs.

Survey results in the form of detailed occupational tables are available upon request from the Division of Research and Statistics. These tables are produced for publishable data at the 2-digit SIC level for occupational employment in New York State.

Occupational Employment in Manufacturing Industries 1992 and 1989

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1993 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN AREAS

Metropolitan areas are defined according to a set of detailed standards published by the federal Office of Management and Budget (OMB). Effective April 1, 1990, the set of areas known as Metropolitan Statistical Areas (MSAs) Primary Metropolitan Statistical Areas (PMSAs) and Consolidated Metropolitan Statistical Areas (CMSAs) were designated collectively as Metropolitan Areas (MAs).

Under these standards, a Metropolitan Statistical Area must have a city with a population of 50,000 or more or an urbanized area of at least 50,000 population, and a total metropolitan area population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the major city, an MSA may include additional counties with strong socio-economic ties to the central county.

If an MSA has a population of 1 million or more, counties or groups of counties within the MSA may qualify as a Primary Metropolitan Statistical Area. An MSA in which two or more PMSAs are identified is designated a Consolidated Metropolitan Statistical Area.

OMB updates the list of Metropolitan Areas each June, adding new areas that qualify as MSAs on the basis of the Bureau of the Census' intercensal population estimates or special census population counts.

Labor Market Areas

Estimates of employment and unemployment are published for a number of areas in the state that do not meet the MSA qualifying criteria. These areas are called Labor Market Areas (LMAs).

The geographic composition of selected areas is given below:

Albany-Schenectady-Troy MSA. Albany, Montgomery, Rensselaer, Saratoga, Schenectady and Schoharie counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls MSA. Erie and Niagara counties.
Dutchess County PMSA. Dutchess County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Newburgh, NY-PA PMSA. Orange county, NY and Pike County, PA.

Labor Market Areas--continued

Putnam LMA. Putnam County.
Rochester MSA. Genesee, Livingston, Monroe, Ontario, Orleans and Wayne counties.
Rockland LMA. Rockland County.
Syracuse MSA. Cayuga, Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State.** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers.** Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

Revised

12. **The Jobseeker.** A 72-page guide designed primarily to assist young people entering the job market. Provides information regarding work skills, career selection, jobseeking skills, tips on how to get and keep a job and specific employment-related activities and instructions. (First copy is free. Additional copies are available at $1.00 per copy.) January 1994.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

Revised

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 40 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

94-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1991.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1991.

MONTH IN REVIEW
May 1994

NOTE: In her testimony before the Joint Economic Committee of the Congress, Bureau of Labor Statistics Commissioner, Katherine Abraham, noted that data users should remember that whenever unusually large movements occur in a single month, the magnitude of those changes often turns out to be overstated once additional data become available.

Civilian Labor Force

Beginning with January 1994, official unemployment rates were based on a redesigned household survey. It will take several months before data from the new survey can be used to reliably gauge labor market conditions.

The state's unemployment rate fell sharply to 6.4 percent in May from 7.6 percent in April as unemployment decreased and employment increased. In New York City, the unemployment rate dropped to 8.4 percent in May, down from 9.5 percent in April. The current rate marked the first time since September 1991 that the City's rate was below 8.5 percent.

The nation's unemployment rate moved lower in May, falling to 5.9 percent from 6.2 percent in April.

Unemployment in the state decreased significantly, falling 106,000 from April to 549,000 in May. Over the previous five years, the April-to-May change averaged an increase of 18,000.

Nonfarm Employment

The number of nonfarm jobs (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State increased 80,400 from April 1994 to 7,851,600 in May, a gain that was primarily seasonal. While this year's increase was not as strong as the April-May job advance in 1993 (+83,400), it exceeded April-May job gains in 1992 (+59,700) and 1991 (+55,200).

The job count rose in all metropolitan areas between April and May. These improvements ranged from 4.2 percent growth in the Glens Falls area to 0.1 percent growth in the Syracuse area.

Staff additions in trade and construction accounted for over half of the April-May nonfarm upturn. The 27,100 rise in trade employment was dominated by pre-summer hiring among eating places. Construction activity continued to rise with improving weather conditions, while adding 14,000 jobs to the April employment count.

Notable employment gains were also registered by the services, government and transportation and public utilities divisions. Service payrolls expanded by 16,200 jobs reflecting hiring by employers in the amusement and recreation services, lodging places, and business services industries. Public sector employment rose 8,600 over the month with the bulk of the expansion occurring among municipal agencies. The return to work of strikers in the trucking industry accounted for the majority of the 7,500 job upturn in the transportation and public utilities group.

Smaller job additions were reported by employers in finance, insurance and real estate (+3,600) and manufacturing (+3,000). Seasonal expansion in the real estate industry accounted for the largest job advance in the finance, insurance and real estate division. Employment in the factory sector normally picks up slightly at this time of year. Over two-thirds of the factory job increase occurred in the nondurable goods segment with hires in the apparel and textile industries leading the soft-goods gain.

Since May 1993, New York State has added 73,900 jobs to nonfarm payrolls, a gain of 1.0 percent. All industry divisions, except manufacturing, shared in the job growth. Industry divisions enjoying the largest job increases included services (+68,500 or +2.8 percent) and trade (+16,700 or +1.1 percent). Manufacturing lost 28,400 jobs (-2.9 percent) over the past twelve months.

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1993

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment, payrolls and reporting unit data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

Effective with the first quarter of 1989, employers with multiple worksites employing 10 or more workers in secondary locations were required to report these worksites separately. Previously, only employers with 50 or more workers at a secondary location were required to file separate multiple worksite reports.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in which the sum of employment in secondary locations exceeds 10 persons, are required to submit a separate report for each unit unless the payrolls are not maintained

separately. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

-- *Albany-Schenectady-Troy.* Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton.* Broome and Tioga counties.
-- *Buffalo.* Erie and Niagara counties.
-- *Nassau-Suffolk.* Nassau and Suffolk counties.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.
-- *Rochester.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Syracuse.* Madison, Onondaga and Oswego counties.
-- *Utica-Rome.* Herkimer and Oneida counties.
-- *Westchester.* Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
THIRD QUARTER 1993

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1993 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN AREAS

Metropolitan areas are defined according to a set of detailed standards published by the federal Office of Management and Budget (OMB). Effective April 1, 1990, the set of areas known as Metropolitan Statistical Areas (MSAs) Primary Metropolitan Statistical Areas (PMSAs) and Consolidated Metropolitan Statistical Areas (CMSAs) were designated collectively as Metropolitan Areas (MAs).

Under these standards, a Metropolitan Statistical Area must have a city with a population of 50,000 or more or an urbanized area of at least 50,000 population, and a total metropolitan area population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the major city, an MSA may include additional counties with strong socio-economic ties to the central county.

If an MSA has a population of 1 million or more, counties or groups of counties within the MSA may qualify as a Primary Metropolitan Statistical Area. An MSA in which two or more PMSAs are identified is designated a Consolidated Metropolitan Statistical Area.

OMB updates the list of Metropolitan Areas each June, adding new areas that qualify as MSAs on the basis of the Bureau of the Census' intercensal population estimates or special census population counts.

Labor Market Areas

Estimates of employment and unemployment are published for a number of areas in the state that do not meet the MSA qualifying criteria. These areas are called Labor Market Areas (LMAs).

The geographic composition of selected areas is given below:

Albany-Schenectady-Troy MSA. Albany, Montgomery, Rensselaer, Saratoga, Schenectady and Schoharie counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls MSA. Erie and Niagara counties.
Dutchess County PMSA. Dutchess County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Newburgh, NY-PA PMSA. Orange county, NY and Pike County, PA.

Labor Market Areas--continued

Putnam LMA. Putnam County.
Rochester MSA. Genesee, Livingston, Monroe, Ontario, Orleans and Wayne counties.
Rockland LMA. Rockland County.
Syracuse MSA. Cayuga, Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State.** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers.** Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

12. **The Jobseeker.** A 72-page guide designed primarily to assist young people entering the job market. Provides information regarding work skills, career selection, jobseeking skills, tips on how to get and keep a job and specific employment-related activities and instructions. (First copy is free. Additional copies are available at $1.00 per copy.) January 1994.

Revised

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 40 pages.

Revised

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

94-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1991.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1991.

Explanation of Data i

List of Publications v

MONTH IN REVIEW
June 1994

Civilian Labor Force

Beginning with January 1994, official unemployment rates were based on a redesigned household survey. It will take up to a year before data from the new survey can be used with confidence to gauge labor market conditions.

New York State's unemployment rate increased sharply in June, up 0.7 of a percentage point from the May 1994 rate to 7.1 percent as both unemployment and employment moved upward. The labor market situation in New York City was relatively unchanged as the city's rate inched upward 0.1 of a percentage point to 8.5 percent in June.

Nationally, the rate of unemployment was 6.2 percent in June, up 0.3 of a percentage point from the jobless rate reported in May.

The May-June increase in the state's unemployment rate followed a huge 1.2 percentage point decline in May. Whenever an unusually large movement occurs in the unemployment rate in a single month, the magnitude of the changes often turns out to be overstated once additional data becomes available. This appears to be the case as both the national and state unemployment rates retraced their steps in June.

Total unemployment in the state reached 624,000 in June, an increase of 75,000 from May 1994. Nearly all of the expansion in joblessness occurred outside the five boroughs of New York City where unemployment was up only 4,000 over the month.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State increased seasonally by 59,000 or 0.8 percent from May 1994 to 7,910,600 in June. This year's May-June improvement was the strongest job gain for the month of June since 1989 when nonfarm employment rose 82,500 from May. The nonfarm job expansion would have been even larger this June if it were not for budget-related job cuts by New York City government.

Monthly job counts rose in all metropolitan areas except Binghamton (-0.4 percent). The sharpest improvements occurred in the amusement and recreation-rich Glens Falls area (+6.3 percent), the Newburgh, NY-PA area (+1.7 percent), the Nassau-Suffolk area (+1.2 percent), and the Elmira area (+1.2 percent).

All major industry divisions, except government, contributed to the May-June rise in nonfarm employment. The employment upturn was led by a 23,900 gain in trade jobs, reflecting seasonal hiring by both wholesalers and retailers. Employers in services, construction, and finance, insurance and real estate reported notable job additions. The job level in services rose 14,300 over the month as many seasonal industries, particularly lodging places and the amusement and recreational services industry began bolstering their staffs in anticipation of warm weather business activity. The services expansion was heavily tempered by furloughs of hourly workers in private education. Construction activity was in full swing while adding 13,400 workers to the month-ago job tally. The bulk of the 10,100 rise in finance, insurance and real estate jobs could be traced to the real estate and brokerage portion of the division.

The manufacturing and transportation and public utility divisions posted smaller employment gains. Manufacturers added 5,200 jobs to their pay rosters in June with four out of five job additions occurring in the nondurable goods sector. The transportation and public utilities group reported 4,300 more jobs in June than was reported in May, with the trucking industry accounting for the largest share of the job increase.

Government was the only industry division that experienced a lower job level in June, down 12,400 from May. Fiscal cutbacks of government employees in New York City, in addition to seasonal furloughs of nonsalaried workers in state and local education, caused a larger-than-average loss in public employment.

There were 83,200 or 1.1 percent more nonfarm jobs in June 1994 than there were in June 1993. The job count has been above prior-year levels since May 1993, marking the fourteenth consecutive gain over year-ago levels. Services (+70,900) and trade (+19,400) showed the most over-the-year improvement over year-ago levels. Manufacturing continued its downward spiral, losing 26,400 workers since June 1993. Government employment showed little change from the year-ago level.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1993 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees.. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN AREAS

Metropolitan areas are defined according to a set of detailed standards published by the federal Office of Management and Budget (OMB). Effective April 1, 1990, the set of areas known as Metropolitan Statistical Areas (MSAs) Primary Metropolitan Statistical Areas (PMSAs) and Consolidated Metropolitan Statistical Areas (CMSAs) were designated collectively as Metropolitan Areas (MAs).

Under these standards, a Metropolitan Statistical Area must have a city with a population of 50,000 or more or an urbanized area of at least 50,000 population, and a total metropolitan area population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the major city, an MSA may include additional counties with strong socio-economic ties to the central county.

If an MSA has a population of 1 million or more, counties or groups of counties within the MSA may qualify as a Primary Metropolitan Statistical Area. An MSA in which two or more PMSAs are identified is designated a Consolidated Metropolitan Statistical Area.

OMB updates the list of Metropolitan Areas each June, adding new areas that qualify as MSAs on the basis of the Bureau of the Census' intercensal population estimates or special census population counts.

Labor Market Areas

Estimates of employment and unemployment are published for a number of areas in the state that do not meet the MSA qualifying criteria. These areas are called Labor Market Areas (LMAs).

The geographic composition of selected areas is given below:

Albany-Schenectady-Troy MSA. Albany, Montgomery, Rensselaer, Saratoga, Schenectady and Schoharie counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls MSA. Erie and Niagara counties.
Dutchess County PMSA. Dutchess County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Newburgh, NY-PA PMSA. Orange county, NY and Pike County, PA.

Labor Market Areas--continued

Putnam LMA. Putnam County.
Rochester MSA. Genesee, Livingston, Monroe, Ontario, Orleans and Wayne counties.
Rockland LMA. Rockland County.
Syracuse MSA. Cayuga, Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State.** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1993-1997. Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)**

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

Revised

12. **The Jobseeker.** A 72-page guide designed primarily to assist young people entering the job market. Provides information regarding work skills, career selection, jobseeking skills, tips on how to get and keep a job and specific employment-related activities and instructions. (First copy is free. Additional copies are available at $1.00 per copy.) January 1994.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

Revised

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 40 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

94-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1991.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1991.

MONTH IN REVIEW

July 1994

Civilian Labor Force

Beginning with January 1994, official unemployment rates were based on a redesigned household survey. It will take up to a year before data from the new survey can be used with confidence to gauge labor market conditions.

The state's unemployment rate inched downward 0.2 of a percentage point from June 1994 to 6.9 percent in July 1994 as the unemployment rate stabilized after several months of volatility. The decline was attributable to heightened labor market activity as employment increased and unemployment decreased slightly. All of the improvement in the jobless rate occurred outside of New York City; the city's rate rose 0.3 of a percentage point to 8.8 percent. The largest decreases in the jobless rate among the major labor areas were reported by the Dutchess County area, down 1.1 of a percentage point to 6.5 percent and by the Binghamton area, down 0.9 of a percentage point to 6.5 percent.

Nationally, the unemployment rate remained unchanged at 6.2 percent in June and July as a 30,000 increase in joblessness was offset by a 639,000 gain in employment. (The unemployment rate is much more sensitive to changes in unemployment than to changes in employment.)

The number of New Yorkers seeking work declined 8,000 over the month to a level of 616,000 in July.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) in New York State declined seasonally in July 1994, falling 83,100 from June to 7,827,500. Each year, the nonfarm job count decreases in July, primarily because of huge staff reductions in public and private education and other school-related industries. The nonfarm downturn was softened somewhat as 53,000 youths were put to work under the Job Training Partnership Act (JTPA).

All industry divisions, except for construction and finance, insurance and real estate, experienced lower employment levels in July. The bulk of the nonfarm job reduction occurred in government, transportation and public utilities, and trade. Government payrolls were reduced by 44,500 jobs as nonsalaried workers in local and state education were given temporary furloughs because of school closings. These job losses were alleviated by the hiring of JTPA summer youth by municipalities. School closings also affected the transportation and public utilities group (-14,700) as school bus companies shut down for the summer. The transportation and public utilities job level was further depressed by the communications industry which continued to downsize its staff. Retailers and wholesalers reported 13,400 fewer workers in July. A major reason for the downturn in trade employment was the furloughing of cafeteria workers contracted by schools.

Seasonal job losses also occurred in the manufacturing (-11,400), and services (-7,200) industry divisions. The decline in factory employment reflected workers taking unpaid vacations with the largest decreases reported by employers in the apparel industry, and in the electronic and electrical equipment industry. The bulk of the decline in services employment could be traced to the closing for the summer of private schools. The services job reduction was partially buffered by seasonal hiring among lodging places and amusement and recreational services.

Both the construction and finance, insurance and real estate divisions posted June-July increases. Construction activity rose by 6,100 jobs, an above-average gain for this time of year. Finance, insurance and real estate jobs were up by 1,800 over the month; hiring by the real estate and brokerage industries led the employment advance.

There were 85,600 or 1.1 percent more nonfarm jobs in July 1994 than there were in July 1993. The job count has exceeded the year-earlier level for 15 consecutive months, dating back to May 1993. All metropolitan areas, except Binghamton (-3,600 or -3.2 percent) and Dutchess County (-1,000 or -1.0 percent), had more jobs in July 1994 than a year ago. On a relative basis, the most improvement occurred in Glens Falls (+3.5 percent) and Utica (+2.2 percent). On an absolute basis, the New York (8-county) Metropolitan Area (+33,100) and Buffalo-Niagara Falls Area (+5,100) reported the largest number of jobs gained since July 1993.

By major industry division, the largest job gains were realized by the services division, up 72,900; and the trade division, up 25,300 from the year-ago job level. Among the industry groups showing fewer jobs than a year ago, the largest loss was sustained by the manufacturing division which was down 27,200 from a year ago.

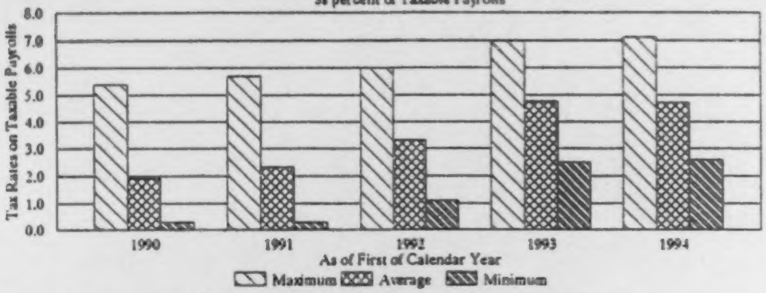
UNEMPLOYMENT INSURANCE TAX RATES, 1991-1994

HIGHLIGHTS

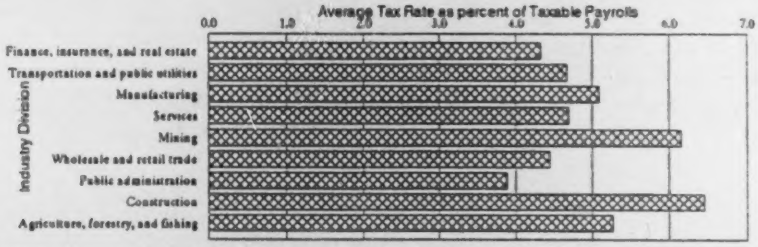
- Unemployment Insurance (UI) tax rates assigned to employers active as of January 1 of calendar years 1991 through 1994, were as follows: 2.33 percent in 1991, 3.32 percent in 1992, 4.76 percent in 1993, and 4.73 in 1994. These rates are shown in the graph below, along with the minimum and maximum rates assigned to employers.

Maximum, Average, and Minimum Tax Rates, by Year
as percent of Taxable Payrolls



- Among the major industry divisions[1], average 1994 tax rates, were highest in construction, and were lowest in public administration.

Average Tax Rates on Taxable Payrolls, by Industry, 1994



- However, when the average effective tax rates on total payrolls are considered, the low-wage-agriculture, forestry, and fishing industry had the highest average tax rate for 1994, while highest-wage-finance, insurance, and real estate industry division had the lowest average rate.

Average Effective Tax Rates on Total Payrolls, by Industry, 1994

---

[1] Major industry groups as defined in the 1987 edition of the Standard Industrial Classification *(SIC)* Manual.

(Highlights continued on next page)

- The tax rates shown in this article include subsidiary taxes of 0.3, 0.6, 0.9, and 1.0 percent of taxable payrolls for 1991 through 1994, respectively. Also tax rates for 1993 and 1994 include a supplemental tax of 0.7 percent. The remainder, the normal component of the average tax rate, is assigned to employers either from the experience rating tax table, (shown in Table 1), or by special statutory provisions described later in this article.

- The maximum taxable wage base of $7,000 applied to tax rates assigned in the period 1991 through 1994.

PROVISIONS FOR RATE ASSIGNMENT

Under the current New York State system, covered employers pay unemployment insurance taxes on the first $7,000 of wages that they pay to each of their employees during the calendar year.[2] These taxes are pooled in an Unemployment Insurance (UI) Fund, from which benefits are paid to all eligible unemployed workers.

An employer's tax rate may consist of three components:

(1) a normal rate, which may be based on both the employer's experience with unemployment and the level of reserves in the UI Trust Fund, and

(2) a subsidiary rate, when required, which is uniformly assessed on all employers subject to unemployment insurance taxes, but varies from year to year, based on the balance in the General Account, and

(3) and a supplemental rate, that when in effect, is a 0.7 percent levy on all employers liable for UI taxes.

Normal Experience-Based Rates

Employers' normal tax rates are determined on the basis of the incidence of unemployment among their workers (often referred to as "experience rating"). A bookkeeping account is set up within the Unemployment Insurance Fund for each covered employer, and the employer's normal taxes are credited, to this account, while chargeable benefits paid to the employer's unemployed workers are debited to the account. On December 31, the computation date for experience rating, each employer's account balance is computed as a percentage of the employer's annual average taxable wages of the last three payroll[3] years, and this "account percentage" is the measure of experience on which the employer's normal tax rate for the next year is based. An account percentage may be positive or negative depending on whether the account showed a positive or negative balance at the end of the year.

Once an account percentage has been computed, the employer's normal tax rate is read from the tax table for experience rating shown in Table 1. The seven columns in the tax table show seven alternative rate schedules, only one of which is applicable in a given year. The appropriate schedule depends on the level of reserves in the Unemployment Insurance Fund--the higher the reserves, the lower the scale of rates. The measure of reserve level used for

* * * * * * * * * * * * *

[2] Covered local governments and nonprofit organizations may elect to reimburse the Unemployment Insurance Fund for benefits paid former employees, instead of paying taxes; the State of New York also reimburses the Fund for benefits.

[3] Effective December 31, 1986, an amendment to the New York state Unemployment Insurance Law, Article 18, Section 581.1(f), provides for computing an employer's account percentage by dividing the employer's account balance by the employer's average annual taxable wages of the last three payroll years *(ending September 30)*. Prior to 1986, it was based on the employer's taxable wages of only the last payroll year.

selecting the proper rate column is the Size-of-Fund Index, which is computed by expressing total year-end reserves as a percentage of the combined taxable wages of all liable firms.[4] On December 31, 1993, the Index stood at 0.3 percent;[5] therefore the second column (from the left) of normal rates in the table applied for 1994. The normal component of tax rates assigned from this column range from 0.9 percent to 5.4 percent.

Following the assignment of normal tax rates for the coming year (but as of the same computation date), if the balance in an employer's account is negative by more than 2 percent of the employer's annual taxable wages, then the amount in excess of 2 percent of the employer's taxable wages is transferred as a charge to the General Account in the Unemployment Insurance Fund. (See the section on "Subsidiary Tax Rate".) Thus, no firm starts the next year with a deficit of more than 2 percent of its taxable payrolls. However, if an employer has part of a negative balance transferred, the normal tax rates assigned on the next three December 31 rate-computation dates are restricted to not less than 5.4 percent, (which in this case is the maximum normal tax rate).[6]

Normal Rates Fixed by Statute

Although most firms' normal tax rates are based on their individual experience, there are five categories of employers not assigned tax rates based on the experience rating tax table (see Table 1.) and are therefore assigned special rates fixed by law:

Minimum tax. The UI Law specifies that an employer must pay at least 0.3 percent combined normal and subsidiary tax. If in any year, 0.3 percent exceeds the sum of the subsidiary tax rate and the employer's rate determined from the normal tax table (See Table 1.), the normal tax is adjusted so that the combination of subsidiary tax plus the normal tax assigned is equal to 0.3 percent (the minimum tax), and the additional amount paid is credited to the employer's account.

Insufficient period of coverage. A firm that has not been liable for contributions more than a year as of the computation date, and is not delinquent in filing reports, is assigned either the highest normal tax rate applicable to a qualified employer with a positive account balance, or 2.7 percent, whichever is lower.

No remuneration. The tax provision for "insufficient period of coverage" above also applies to firms that paid no wages[7] in the last payroll year.

Delinquent in reporting. An employer who has not filed all prescribed reports by the computation date, must pay a normal tax rate of 5.4 percent.

Restricted rates. The UI law specifies, as previously implied, that a normal tax rate of not less than 5.4

* * * * * * * * * * * * *

[4] The denominator in this computation of the Size-of-Fund Index is the greater of combined taxable wages of the last payroll year *(ending September 30)* or the annual average of combined taxable wages of the last three payroll years.

[5] There was a net positive balance of $133.5 million in the Fund at the end of 1993.

[6] The normal restricted rate was raised to 5.4 percent in 1985 from 2.7 percent in 1984. Prior to 1985, a firm in a restricted category received a rate that was either 2.7 percent, or the rate determined by the experience rating process from the normal table that was in effect at the time, whichever rate was higher. The maximum normal rate in 1984 was 4.2 percent.

[7] In 1994 the normal rate for these two groups of employers *(insufficient period of coverage and no remuneration)* was 2.7 percent.

percent[8] is assigned when, in at least one of the last three prior years, a portion of an employer's negative balance is transferred to the General Account in the Unemployment Insurance Fund.

Subsidiary Tax Rate

To finance transferred negative balances[9] and offset other miscellaneous charges and transfers, the General Account is credited with the interest earned on reserves in the UI Fund. This interest alone, however, has not been enough to fully offset the charges. The law therefore provides that if the year-end balance in the General Account is less than $120 million, all employers liable for unemployment insurance taxes pay a subsidiary tax in the coming year in addition to their normal tax, and the proceeds from the subsidiary tax are credited to the General Account. The subsidiary rate (when in effect) varies from 0.1 percent to 1.0 percent, according to the size of the General Account balance, but it cannot increase more than 0.3 percent in any one year. The subsidiary tax rate is added to an employer's assigned normal unemployment insurance tax rate. On December 31, 1993 there was a deficit of $2,042 million[10] in the General Account.

Supplemental Tax

Legislation enacted in 1989 provides for a supplemental tax of 0.7 percent, which is added to each employer's normal tax. This tax, which triggers "on" when the Size-of-Fund Index falls below 2%, took effect for tax rates assigned in 1993 and 1994. This component of the tax, when in effect, is credited to each employer's UI account.

The New York State Unemployment Insurance tax rates shown in the remainder of this article include any subsidiary or supplemental tax, when in effect.

* * * * * * * * * * * * *

[8] In this case, the restricted rate of 5.4 percent is the maximum tax rate on the *(current)* normal tax table *(see Table 1)*. See prior footnote under the section "Normal Experience-Based Rates", last paragraph.

[9] The amount of negative balance deficits that were transferred to the General Account on December 31, 1993 amounted to almost $687 million. Other charges to the General Account include training benefits paid under Section 599.2 of the UI law. Section 599.2 was amended, effective July 23 1991, to increase the 13-week benefit extension available to training participants to 26 weeks, and to increase from ten to twenty million dollars the yearly funds available to claimants participating in such courses or programs. Also, balances of employer accounts which have gone out of business (positive or negative), are transferred to the General Account. There are also other minor credits and charges to the General Account.

[10] The General Account deficit of $2,042.4 million on December 31, 1993, computed on a cash basis in accordance with the New York State Unemployment Insurance Law, has been used to determine that a subsidiary tax of 1.0 percent will be levied on New York State employers during calendar year 1994. *(In accordance with "Generally Accepted Accounting Principles" (GAAP), the General Account had a deficit of $1,914.5 million on December 31, 1993.)*

---

1. On January 1, 1983 the taxable wage base was raised from $6000 to $7000.
2. An employer's account percentage is the December 31 balance in the employer's account in the Unemployment Insurance Fund, as a percentage of the employer's average yearly taxable wages in the last three payroll years (ending September 30).
3. The Size-of-Fund Index is the moneys in the Fund on December 31, as a percentage of all taxable wages in the last payroll year, or as a percentage of the annual average of the taxable wages of the last three payroll years, whichever percentage is less.
4. The U.I. Law specifies that an employer must pay at least 0.3 percent combined normal and subsidiary tax. If in any year, 0.3 percent exceeds the sum of the subsidiary tax rate and the employer's rate from this table, the additional amount paid is credited to the employer's account.

RATE ASSIGNMENTS FOR 1994

On the December 31, 1993 computation date, more than 436,000 employers were assigned UI tax rates for 1994 (see Table 2A). The tax rates for more than 283,000 of these firms were based on their experience with unemployment while covered under the UI system (experience rating), while almost 153,000 of these firms were assigned tax rates fixed by statute.

The total number of positive and negative balance firms assigned tax rates on the computation date (December 31, 1993) are shown below. Included, in addition to experience-rated firms, are firms whose rates were fixed by statute.

Category	Number of firms	Percent of all active firms
Total-all active firms	436,137	100.0
Positive balance firms	365,781	83.9
Negative balance firms	70,356	16.1

Their taxable payrolls during the 12-month period ending September 30, 1993 were:

Category	Taxable payrolls	Percent of all active firms
Total-all active firms	$42,870,455,000	100.0
Positive balance firms	$32,758,640,000	76.4
Negative balance firms	$10,111,815,000	23.6

Size-of-Fund Index

The balance of the New York State UI Fund on December 31, 1993 was $133.5 million. This, together with employers' taxable payrolls, was used to compute the Size-of-Fund Index of 0.3 percent. This Size-of-Fund Index was used to determine that the second highest tax column (second from the left in Table 1) for the normal component of experience-based rates is effective for 1994.

Experience Based Tax Rates

There were more than 283,000 employers assigned rates for 1994 from the tax table for experience rating (Table 1). Almost 22,000 of these firms, (almost 8 percent of all experience-rated firms, accounting for more than 10 percent of their taxable payrolls[11]) had negative account balances. Their tax rates ranged from 5.4 percent to the maximum 7.1 percent (see Table 2A). Of these, almost 6,500 firms, whose rates were based on their negative account percentage of 12 percent or more, received the maximum rate in 1994.

There were almost 262,000 experience-rated firms that had positive account percentages by the end of 1993. These accounted for almost 60 percent of all active firms and more than 92 percent of

* * * * * * * * * * * * *

[11] Firms with negative balances whose rates were fixed by statute are not included in these counts.

1. Tax rates for 1994 include a subsidiary tax of 1.0 percent, and a supplemental tax of 0.7 percent.
2. Accounts of firms that are liable for unemployment insurance tax contributions.
3. Taxable payrolls for the 12-month period ending September 30, 1993 .
4. Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.
5. Represents an average tax rate weighted on taxable payrolls in a combined class of firm or account percentage group.
6. Firms that had parts of negative balances transferred to the General Account within the last three years.

NOTE: Details may not add to totals because of rounding.

experience-rated firms. They were the source of about 67 percent of all taxable payrolls, and almost 90 percent of taxable payrolls of those that were experience rated. Tax rates assigned to these firms for 1994 ranged from 2.6 to 5.2 percent. Of these, more than 140,000 firms qualified for the minimum rate of 2.6 percent.

Rates Fixed by Statute

Almost 153,000 firms had tax rates fixed by statute (instead of being based on the experience-rating tax table). These rates ranged from 4.4 to 7.1 percent. The number in this category has been rising since 1991 when there were about 124,000 such firms.[12]

Firms whose normal tax rates were fixed by statute (excluding those that paid no wages in the past year) comprised more than 33 percent of all liable firms but accounted for less than 25 percent of the taxable payrolls, primarily because they generally were of smaller than average size, (except for firms in the "restricted" category),[13] and also because the payrolls of newly liable employers covered less than a full year.

More than 74,000 of the non-qualified firms received restricted rates and represented almost 49 percent of the employers whose tax rates were fixed by statute.

More than 34,000 of the non-qualified firms were delinquent in reporting.

Firms that had been in the UI system less than a year (numbering more than 37,000), and those with no remuneration (about 7,000), were assigned a tax rate of 4.4 percent.

Subsidiary and Supplemental Tax Rates

A subsidiary tax of 1.0 percent was levied on covered employers in New York State during 1994. The General Account balance[14] on December 31, 1993 had a deficit of about $2,042 million.[15] The subsidiary tax during each year from 1990 through 1993 was as follows: 0.0 percent in 1990, 0.3 percent in 1991, 0.6 percent in 1992, and 0.9 percent in 1993.[16] The proceeds from this tax are credited to the UI General Account. Also, a supplemental tax of 0.7 percent became effective for tax rates assigned during 1993 and 1994. The proceeds from this tax are credited to each employer's UI account. The tax rates shown in this article include both the subsidiary and supplemental tax in the years that they are effective.

---

[12] This number would only be slightly lower than the number that occurred during 1990, provided that firms that were in the minimum tax category during 1990 were not counted. *(See the article titled "Unemployment Insurance Tax Rates, 1990" in the December 1990 issue of "Employment Review" by the New York State Department of Labor.)*

[13] The size of a firm is defined by its annual taxable payrolls reported for the 12-month period ending September 30. The average size of firm in the "restricted" category was greater than the average size for all firms receiving tax rates for 1994.

[14] A 17-year string of deficits in the General Account ended in 1988 with a positive year-end balance of $418 million. This surplus culminated an eight-year recovery from a prior record deficit of $1,163 million in 1980. On December 31, 1989 and on each computation date thereafter, the General Account balance dropped continuously, becoming a deficit again *(of almost $833 million)* on December 31, 1991, and reaching new record deficits of about $1,682 on December 31, 1992, and $2,042 on December 31, 1993.

[15] The General Account must have a surplus of at least $12 million before the subsidiary tax may begin to be lowered from the maximum 1% rate.

[16] The subsidiary tax rate established as of any computation date may in no event exceed by more than three-tenths of one percentage point, the rate of subsidiary tax established from the preceding computation date.

Tax Rates by Industry and Size

Among major industry divisions, average 1994 tax rates ranged from 3.88 percent in public administration to 6.45 percent in construction. Within major divisions, however, there was even greater variation of average tax rates for industry subgroups, as indicated in Table 3. The rates ranged from 2.92 percent in electric, gas, and sanitary services to 6.90 percent for heavy construction contractors.

Average 1994 tax rates by size of firm are shown in Table 5. Employers were classified by size on the basis of their taxable payrolls in the 1993 payroll year. Tax rates averaged lowest for firms with taxable payrolls less than $25,000 or over $25 million and highest for those with taxable payrolls ranging from $250,000 to $2,499,999.

Tax Rates on Total and Taxable Payrolls

The average tax rate on taxable payrolls dropped to 4.73 percent in 1994 from 4.76 percent in 1993. This occurred mainly because revenues credited exceeded benefits charged to the UI Fund during calendar year 1993 (for the first time in five years), which in turn caused many employers' account percentages to shift into lower tax rate brackets.[17] The average effective tax rate on total payrolls declined to 1.04 percent in 1994 from 1.11 percent in 1993. This percentage point drop is greater than that based on taxable payrolls because average total wages increased while the maximum taxable wage base remained at $7,000 for 1993.

* * * * * * * * * * * * *

[17] Total benefits charged to employer accounts in the UI Fund decreased during 1993 because of a lower number of insured unemployed. While total benefits decreased, revenues increased during calendar year 1993 due to higher tax rates being in effect as compared to calendar year 1992. *(A supplemental tax of 0.7 percent became effective for the first time during 1993. The revenues from the supplemental tax are credited to employers' accounts. Although the subsidiary tax also increased, the proceeds from this tax are credited to the General Account. Consequently, the increase was not a factor in the lowering of employers' tax rates for 1994. The subsidiary tax rate in 1993 was 0.9 percent, while in 1992 it was 0.6 percent. There was no increase in the maximum benefit during 1993. Increases in maximum benefit occurred in 1989 through 1992, (from $180 to $240 on April 17, 1989, to $260 on April 16, 1990, to $280 on April 15, 1991, and then to $300 on February 3, 1992.))*

EXPERIENCE IN 1993[18]

This section pertains to the 1993 experience of those firms which were active at the end of 1993 and were assigned tax rates for 1994. Taxable payrolls[19] in 1993 were determined by the $7,000 maximum taxable wage base.

Taxable Payrolls in Relation to Total Payrolls by Industry and Size of Firm

Taxable and total payrolls by major industry group and by size of annual taxable payroll are shown in Tables 6A through 6D for the payroll years ending September 30, 1993 through 1990, respectively. Within years, percentages of total payrolls that were taxable on the $7,000 tax base varied widely among industry groups and also among size groups.

One cause of these variations was the differences in average wage levels among employer groups. Firms with relatively high average wage levels tended to have lower percentages of payrolls that were taxable, on the $7,000 wage base, than firms with lower wage levels.

A second factor, labor turnover, also affected the percentage of payrolls that were taxable. Wages up to $7,000 were taxable if a position in a firm was filled by the same individual all year. If the position was filled by one person part of the year and by another the rest of the year, wages up to $7,000 were taxable for each of the two employees. Thus, the taxable proportion was likely to be greater in firms and industries where there was high turnover.

Table 6A indicates that among industry divisions, the finance, insurance and real estate, the transportation and public utilities, and the manufacturing industries had relatively low percentages of payrolls that were taxable in 1993, while the agriculture, forestry and fishing, and public administration industries had the highest percentages.

Also, Tables 6A through 6D show a generally downward progression in the average percentage of wages taxable, as the size of firm increases from the $10,000 to $25,000 range of a firm's taxable wages. In the 1993 payroll year, these averages ranged from almost 33 percent for firms with taxable payrolls between $10,000 and $25,000 down to about 16 percent for those in the $25 million-and-over bracket.

When compared over the time period 1991 through 1993, Tables 6D through 6A show a steady downward trend, in general, by most classifications of industry or by size of firm, in the percent of total payrolls that are taxable. This is occurring mainly because, in general, employees' wages are increasing from year to year (see table on the following page), while the maximum that an employer may be taxed on each employee's wages, (the maximum taxable wage base) has remained unchanged, at $7,000 per employee throughout the period.[20]

The average weekly wages of covered employment in firms liable for UI taxes by selected industry groups and by calendar years 1989 through 1993 are shown on the following page:

* * * * * * * * * * * * *

[18] Data by more detailed industry classifications, including data on contributions paid and benefits charged, will be included in a forthcoming bulletin, New York State Unemployment Insurance Tax Rates, 1991-1994.

[19] Payrolls, shown on Tables 2A and 6A through 2D and 6D in this article are for the 12-month periods ending September 30, 1990 through September 30, 1993, in inverse chronological order respectively, and are on the $7,000 maximum-taxable-wage base.

[20] The maximum taxable wage base has been $7,000 since January 1, 1983.

Average Weekly Wages[21] for Covered Employment in Taxed[22] Firms. by Calendar Year and Industry

Industry	Calendar Year:	1993	1992	1991	1990	1989
All industries		$642.15	$635.36	$581.70	$558.26	$529.13
Goods Producing		703.38	694.28	658.34	627.42	594.47
Manufacturing		714.73	704.41	664.28	630.15	593.93
Mining		797.40	779.06	752.96	824.40	819.97
Construction		655.57	650.61	633.86	614.01	592.22
Service Producing		625.96	618.78	558.70	536.88	507.95
Agriculture, Forestry and Fishing		353.68	351.71	345.08	334.72	318.11
Transportation and Public Utilities		729.76	728.38	678.62	659.35	631.93
Wholesale and retail trade		430.15	427.32	405.09	393.59	377.69
Finance, insurance, and real estate		1,153.03	1,130.46	907.78	857.64	809.38
Services		562.44	554.57	525.22	509.12	477.39
Public Administration		316.18	299.30	290.01	275.25	260.54
Unclassified		410.95	459.69	404.07	387.31	398.40

10.25% but less than 10.5%	2.6	6,250	1.43	319,440	0.74	33,461,839
10.5% or more	2.5	105,122	24.13	3,331,871	7.76	467,190,634

1. Tax rates for 1993 include a subsidiary tax of 0.9 percent, and a supplemental tax of 0.7 percent.
2. Accounts of firms that are liable for unemployment insurance tax contributions.
3. Taxable payrolls for the 12-month period ending September 30, 1992 .
4. Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.
5. Represents an average tax rate weighted on taxable payrolls in a combined class of firm or account percentage group.
6. Firms that had parts of negative balances transferred to the General Account within the last three years.

NOTE: Details may not add to totals because of rounding.

10.0% but less than 10.25%	0.5	6,446	1.45	432,797	0.93	43,722,780
10.25% but less than 10.5%	0.4	5,772	1.30	382,325	0.82	39,865,268
10.5% or more	0.3	102,736	23.05	3,419,722	7.37	480,638,252

1. Tax rates for 1991 include a subsidiary tax of 0.3 percent.
2. Accounts of firms that are liable for unemployment insurance tax contributions.
3. Taxable payrolls for the 12-month period ending September 30, 1990 .
4. Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.
5. Represents an average tax rate weighted on taxable payrolls in a combined class of firm or account percentage group.
6. Firms that had parts of negative balances transferred to the General Account within the last three years.

NOTE: Details may not add to totals because of rounding.

Table 3. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY DETAILED INDUSTRY CLASSIFICATION, NEW YORK STATE, 1990 - 1994

Industry code and industry within industry division [1]	Number of employer accounts 1994 [2]	Average tax rates [3]				
		1994	1993	1992	1991	1990
All industries [4]	436,137	4.73	4.76	3.32	2.33	1.93

76 Miscellaneous repair services	3,983	5.01	4.93	3.50	2.48	2.14
78 Motion pictures	3,526	5.05	5.08	3.63	2.65	2.27
79 Amusement & recreation services	7,398	5.47	5.46	4.05	3.31	2.94
80 Health services	30,853	3.77	3.88	2.49	1.59	1.25
81 Legal services	11,992	4.37	4.47	3.05	1.90	1.46
82 Educational services	2,325	4.54	4.58	3.19	2.21	1.83
83 Social services	5,895	4.60	4.66	3.20	2.25	1.84
84 Museums, botanical, zoological gardens	251	5.09	5.03	3.70	2.73	2.17
86 Membership organizations	6,655	4.18	4.25	2.86	1.94	1.59
87 Engineering & management services	17,832	5.08	5.07	3.60	2.44	1.90
88 Private households	16,599	3.72	3.76	2.48	1.65	1.36
89 Miscellaneous services	957	4.83	4.92	3.44	2.31	1.72
Public administration (91-97)	528	3.88	3.97	2.55	1.61	1.37

1. The industry divisions and groups are classified in accordance with the 1987 edition of the Standard Industrial Classification Manual.
2. Accounts of firms that are liable for unemployment insurance tax contributions.
3. Average rates on a $7,000 taxable wage base. In 1994, the rates shown include a 1.0 percent subsidiary tax. In years 1993 through 1991, they included a subsidiary tax of 0.9, 0.6 and 0.3 percent respectively. Also, for years 1993 and 1994 only, a 0.7 percent supplemental tax is included in all tax rates shown above. The supplemental tax first became effective with 1993 tax rates. For year 1990, there was no subsidiary or supplemental tax in effect. For years 1991 through 1994 average tax rates are preliminary and may be revised.
4. The average tax rate for "All industries" combined includes firms not classified industrially. The active firms not classified industrially, that were liable for taxes on January 1, 1994, numbered 16,965. From January 1, 1993 through 1990, they numbered 18,863, 16,990, 15,060 and 18,508 respectively.

Table 4. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY INDUSTRY IN RELATION TO TAXABLE AND TOTAL PAYROLLS, 1990-1994

Industry[1]	Average tax rates[2]									
	Based on taxable payroll[3]					Based on total payroll[4]				
	1994	1993	1992	1991	1990	1994	1993	1992	1991	1990

1. Firms assigned tax rates since 1989 are being classified in accordance with the 1987 edition of the Standard Industrial Classification Manual.
2. Average rates for 1991 through 1994 include subsidiary taxes of 0.3, 0.6, 0.9 and 1.0 percent, respectively. Also, average rates for 1993 and 1994 include a supplemental tax of 0.7 percent.
3. Average rates on a $7,000 tax base.
4. Average tax rates from 1991 through 1994 are preliminary, and average effective tax rates on total payrolls for 1994 are estimated and may be revised.

r. Revised

Table 5. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY SIZE OF FIRM
NEW YORK STATE, 1990 - 1994

Size of annual taxable payroll[1]	Number of employer accounts 1994 [2]	Average tax rates[3]

---

1. Taxable payrolls are for the 12-month periods ending September 30.
2. Accounts of firms that are liable for unemployment insurance tax contributions as of December 31, 1993.
3. Average rates on a $7,000 taxable wage base. In 1994, the rates shown include a 1.0 percent subsidiary tax. In years 1993 through 1991, they included a subsidiary tax of 0.9, 0.6 and 0.3 percent respectively. Also, for years 1993 and 1994 only, a 0.7 percent supplemental tax is included in all tax rates shown above. The supplemental tax first became effective with 1993 tax rates. For year 1990, there was no subsidiary or supplemental tax in effect. For years 1991 through 1994, average tax rates are preliminary and may be revised.

INSURED EMPLOYMENT AND PAYROLLS
FOURTH QUARTER 1993

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 or more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organizations were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Effective January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were covered by unemployment insurance.

Agricultural labor was also covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Effective with first quarter 1985 data, employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are included in this series.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, the self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Insured employment, payrolls and reporting unit data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

Effective with the first quarter of 1989, employers with multiple worksites employing 10 or more workers in secondary locations were required to report these worksites separately. Previously, only employers with 50 or more workers at a secondary location were required to file separate multiple worksite reports.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in which the sum of employment in secondary locations exceeds 10 persons, are required to submit a separate report for each unit unless the payrolls are not maintained

separately. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earnings wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover all wages and salaries paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1972 edition.

When a 2-digit manufacturing industry has less than 100 employees or less than three reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the state, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below:

-- *Albany-Schenectady-Troy.* Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
-- ***Binghamton.*** Broome and Tioga counties.
-- ***Buffalo.*** Erie and Niagara counties.
-- ***Nassau-Suffolk.*** Nassau and Suffolk counties.
-- ***New York City.*** Bronx, Kings, New York, Queens and Richmond counties.
-- ***Rochester.*** Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- ***Syracuse.*** Madison, Onondaga and Oswego counties.
-- ***Utica-Rome.*** Herkimer and Oneida counties.
-- ***Westchester.*** Westchester County.

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT AND PAYROLLS IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FOURTH QUARTER 1993

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1993 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN AREAS

Metropolitan areas are defined according to a set of detailed standards published by the federal Office of Management and Budget (OMB). Effective April 1, 1990, the set of areas known as Metropolitan Statistical Areas (MSAs) Primary Metropolitan Statistical Areas (PMSAs) and Consolidated Metropolitan Statistical Areas (CMSAs) were designated collectively as Metropolitan Areas (MAs).

Under these standards, a Metropolitan Statistical Area must have a city with a population of 50,000 or more or an urbanized area of at least 50,000 population, and a total metropolitan area population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the major city, an MSA may include additional counties with strong socio-economic ties to the central county.

If an MSA has a population of 1 million or more, counties or groups of counties within the MSA may qualify as a Primary Metropolitan Statistical Area. An MSA in which two or more PMSAs are identified is designated a Consolidated Metropolitan Statistical Area.

OMB updates the list of Metropolitan Areas each June, adding new areas that qualify as MSAs on the basis of the Bureau of the Census' intercensal population estimates or special census population counts.

Labor Market Areas

Estimates of employment and unemployment are published for a number of areas in the state that do not meet the MSA qualifying criteria. These areas are called Labor Market Areas (LMAs).

The geographic composition of selected areas is given below:

Albany-Schenectady-Troy MSA. Albany, Montgomery, Rensselaer, Saratoga, Schenectady and Schoharie counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls MSA. Erie and Niagara counties.
Dutchess County PMSA. Dutchess County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Newburgh, NY-PA PMSA. Orange county, NY and Pike County, PA.

Labor Market Areas--continued

Putnam LMA. Putnam County.
Rochester MSA. Genesee, Livingston, Monroe, Ontario, Orleans and Wayne counties.
Rockland LMA. Rockland County.
Syracuse MSA. Cayuga, Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

Recurrent Report 8 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

1. **Employment in New York State.** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1993-1997.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns. See page viii for map of regions. (First copy is free. Additional copies are available at $5.00 per copy.)

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

Revised

12. **The Jobseeker.** A 72-page guide designed primarily to assist young people entering the job market. Provides information regarding work skills, career selection, jobseeking skills, tips on how to get and keep a job and specific employment-related activities and instructions. (First copy is free. Additional copies are available at $1.00 per copy.) January 1994.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

Revised

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 40 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. **Directory of Labor Unions and Employee Organizations in New York State, 1992.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-3. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. **New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991.** An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.

93-2. **Post-Apprenticeship Experience of Participants in New York State Apprenticeship Programs, 1990-1991.** The results of a survey of former apprentices to obtain information on the training experience, job search and subsequent employment of those who had been enrolled in an apprenticeship program. The focus of this particular study was on exploring whether any notable differences existed in the apprenticeship experience of white male or minority male or female apprenticeships.

94-1. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1991.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1991.
